Swaraj Kumar

Gituswaraj

SUMMARY

Software Engineer with strong foundation in **Data Structures, Algorithms, and problem solving**. Experienced in building scalable full-stack applications using **MERN stack, RESTful APIs**, and efficient database design. Skilled in **optimizing performance and developing robust, production-ready systems**.

WORK EXPERIENCE

03/2026 – Present
New Delhi

Software Engineer

MateBiz Pvt Ltd.

- Collaborated with **cross-functional teams (UI/UX, Frontend, Content, QA)** to develop scalable web solutions, translating **Figma mockups** into responsive frontend interfaces using modern technologies.
- Developed and optimized scalable admin dashboards using **React.js, Node.js, and data handling** approaches to improve operational efficiency and system performance.
- Managed **product listings, user/member data, and client requirements**, ensuring efficient workflows, clear communication, and alignment with business goals.
- Built and optimized WordPress-based web solutions with focus on performance and SEO.
- Handled **project timelines and multiple deliverables simultaneously**, while managing hosting and deployment using **cPanel** (domain setup, file management, server configuration).

INTERNSHIPS

07/2025 – 12/2025
New Delhi

SDE Intern

Comtech Info Solutions Private Limited

- Developed **frontend survey forms (React.js)** to collect structured data from U.S. hospital systems for analyzing and measuring cybersecurity threats and vulnerabilities.
- Wrote **clean, scalable, and maintainable code following SDLC** practices and coding standards.

07/2024 – 12/2024
Jharkhand, India

Business Research Intern

mDoc Info Pvt. Ltd.

- Collect, analyze, and interpret market trends, competitor data, and customer insights to **support business decisions**.
- Prepare **research reports, summaries, and presentations** with **actionable insights** for strategy and growth planning.

PROJECTS

Issue-Insight Tool

Bug Resolution Management System

- Designed and developed a centralized system to **identify, track, and of incidents/issues**, improving resolution efficiency and reducing repeat failures.
- Implemented structured workflows for **corrective actions, and reporting**, enabling data-driven decision-making and continuous process improvement.

ArchGenie

Software & Hardware ER Generator Tool

- Designed and developed a **Software & Hardware ER Generator Tool** to automatically create **Entity-Relationship (ER) diagrams** from system specifications, reducing manual design effort and improving accuracy in database and system modeling.
- Built an automated ER diagram generator with structured system modeling logic, improving database design accuracy and **reducing manual effort by 40%**.
- Enabled **integrated analysis of software modules and hardware components**, helping engineers visualize dependencies, data flow, and relationships for better system architecture planning and documentation.

TECHNICAL SKILLS

Programming Languages — C++, JavaScript, TypeScript

Frameworks and Libraries — ReactJS, Node.js, Next.js

Databases — MongoDB, MySQL

Web Development Stack — MERN Stack (MongoDB, ExpressJS, ReactJS, Node.js)

Core Concepts — Object-Oriented Programming (OOP), Git, GitHub, System Design, SDLC,

Data Analysis/ Tools — Tableau, MS Excel, SQL

SOFT SKILLS

Problem Solving • Stakeholder Management • Team Collaboration • Creative Thinking • Data-Driven

EDUCATION

2022 – 2026

Bhagwan Parshuram Institute of Technology, IPU
B.Tech - Electronics & Communication Engineering | CGPA : 8.4

ACHIEVEMENTS

- **Crack-a-Code 3.0 Hackathon (Nagarro):** Guided a 3-member team to achieve **3rd position, showcasing problem solving, algorithmic thinking, coding proficiency, and collaboration** under pressure
- **Coordinator - BPIT Cultural Society:** Led 10+ tech & non-tech events, improving campus engagement by 25%.
